

INTRODUCING THE NEW IVOTION™ DIGITAL DENTURE SYSTEM

WIAND DENTAL
LABORATORY

SEAMLESS AND FAST DIGITAL FABRICATING OF
HIGH-QUALITY REMOVABLE DENTURES!

Course Description:

Wiand Dental Lab, your local denture expert, is excited to introduce you to The Ivotion™ Digital MILLED Denture! As a lab, we have been watching and experimenting with different kinds of digital dentures, but none compares to the streamlined workflow, strength and aesthetics of Ivotion™. Join us to learn how Ivotion™ works and how it can benefit your practice and your patients. Presented by Tom Wiand, CDT and staff, we will walk you through digital and conventional workflows, compare the treatment sequences for a conventional denture versus an Ivotion™ denture, demonstrate the cost savings of Ivotion™ and educate you about what makes this milling process superior. Learn and grow with us to be able to offer this amazing product to your patients!

Course Objectives:

- Identify the products available via the PM7 mill
- Learn the difference between printed and milled dentures
- Understand the multiple workflow options available
- Understand the benefits of a digital workflow
- Know costs involved and impact on profit
- Determine how Ivotion™ can work in your practice

Tom Wiand, CDT has been the Owner and General Manager of Wiand Dental Laboratory for nearly 30 years specializing exclusively in removable prosthetics, implant assisted/supported dentures and now the All-on-4™. The son of a general dentist, he was formally educated in dental technology at the McCarrie School of Health Sciences and Technology in Philadelphia where he received his Associates Degree in 1990. A true professional, Tom is a Certified Dental Technician (CDT), an elite group of less than 10% of all technicians in the U.S. He is certified on the BPS Brand Prosthetic System from Ivoclar (1998) as well as the Staub Cranial System (2009). An expert on the All-on-4™, Tom has restored over 2,000 of these cases and speaks on behalf of multiple implant companies about this progressive treatment option. Dedicated to education, Tom serves as an adjunct instructor at the Arizona School of Dentistry and Oral Health. Tom is also a dental technician alliance member of the American College of Prosthodontics (ACP) and an active member of the National Association of Dental Laboratories (NADL). He also consistently donates his time, talents and resources to the AzDA DDS program, A.T. Stills C.A.R.E program, the Arizona Mission of Mercy and the Smiles Beyond the Bars.
