

Digital Restorative Workflow for All-on-X Hybrid Restorations

COURSE DESCRIPTION: We are excited to introduce you to a new groundbreaking workflow for All-on-X hybrid restoration. Digital is moving fast and evolving the way we do things inside our laboratory. We are constantly looking for new innovative ways to fabricate your dental cases better, faster and more efficiently. This includes finding ways to streamline treatment and restore your patients faster. After several months of testing and experimenting, we have developed and mastered a cutting-edge digital workflow for restoring hybrids with benefits for both the doctor and the patient. Join us to walk through this new workflow for any hybrid restoration and discover the direct benefits of it for your practice! When you work with Wiand, we are here to support, educate and empower you with new options and techniques ahead of the curve, giving your practice a competitive edge! **This event is for dentists. We will host the same for assistants on 6/19.**

Many thanks to iTero for sponsoring our event!

LEARNING OBJECTIVES:

- Discover scanning techniques for restorative success hands-on
- Review the step-by-step clinical protocol of each appointment
- Review laboratory steps and overall appointment sequence
- Explore both patient and doctor benefits
- Examine the positive financial impact using this workflow
