

Give Your Patients the ROYAL Treatment With Wiand's Custom Shade Service for the Highest Aesthetics!

At Wiand Dental Laboratory, excellence and precision are our top priorities. Our commitment to quality means we meticulously follow our established protocol to ensure outstanding results for both patients and doctors. For seamless execution, we ask that you please also let your patients know that special situations may require two visits.

Appointment #1

At this appointment, we will choose the shade and discuss the patient's aesthetic expectations. Photos will also be taken during the visit. Expect this appointment to last approximate 20-30 minutes.

Requirements:

- ✓ Bleaching must be completed 5 days prior to this appointment
- ✓ Shade must be taken before preparation or no less than 24 hours after preparation
- ✓ Stump shade is always needed for all ceramic restorations
- ✓ Reduce preparation up to an additional 1.5mm for dark stumps

Appointment #2 (if needed)

This appointment takes approximately 1 hour and is only needed in certain situations. If needed, the lab will communicate with your office to schedule this appointment in our lab shortly before the completion of the restoration to verify the shade and make final adjustments.

For Best Results:

- ✓ Include photos of pre-op teeth
- ✓ Include models, impressions or scans of pre-op teeth
- ✓ Include models, impressions or scans of adjusted temps
- ✓ Opaque dark preparations
- ✓ Use colored cements during insertion to fine-tune shade

Please note: We require 12 business days to complete custom shade cases, regardless of the fabrication material. Implant or large restorative cases may require additional time.
