

Setting your practice up for success with digital workflows for dentures

COURSE OBJECTIVES

Learn how to quickly and efficiently execute digital denture workflows for high-quality definitive dentures.

Saving time and money in your practice is more critical than ever. Join Tom Wiand, CDT, and team to explore how offering dentures fabricated from a digital workflow will help you accomplish that and do more dentistry to grow your practice!

Edentulism is at its highest rate ever and digital dentures are an ideal solution for your patients. Together, we will walk through scanning, digital workflows, printing versus milling and the many benefits of digital dentures.

LEARNING OBJECTIVES

- Review scanning options and tips
- Identify product indications and options available for your patients
- Understand the differences between printing and milling
- Compare analog to digital appointment sequences
- Review digital workflow possibilities for all types of cases
- Understand how digital can save you time and money
- Learn how to get started with digital dentures

SPEAKER: Tom Wiand, CDT

The owner and general manager of Wiand Dental Lab since 1992, Tom Wiand, CDT, specializes in removables and implant prosthetics, All-on-X and more recently, crown and bridge using both conventional and digital workflows and techniques.

Tom was formally educated in dental technology at the McCarrie School of Health Sciences and Technology in Philadelphia where he received his associate degree in 1990. Tom is certified on the BPS Brand Prosthetic System from Ivoclar (1998) as well as the Staub Cranial System (2009). He became a certified dental technician (CDT) in 2009.

An early adopter of All-on-X, Tom has restored over 5,000 immediate load cases and speaks on behalf of multiple implant companies about this progressive treatment option.
